Borrower	**Campo Santa Elena S.A. (F004)**	Loan	**L004 · Crop input loan · $105,000**

Proposal to extend the maturity of loan L004 to 13 Mar 2024 (next harvest), with interest-only payments until then.

1. Current position

Outstanding principal	**$105,000**	Stress level / score	**Severe / 100**
IFRS 9 stage	**Stage 2 (critical climate alert (level Severe))**	Current maturity	**24 Apr 2023**
Days past due	**0**	Remaining scheduled debt service	**$110,434**

Due date	Principal	Interest	Total	Status
24 Apr 2023	$105,000	$5,434	$110,434	unpaid

2. Rationale: repayment capacity at the expected yield

Yield case	t/ha	Revenue at $520/t	Remaining debt service	Coverage
p50 (expected)	2.08	$356,334	$110,434	**3.23x**
p10 (bad draw)	1.86	$318,682	$110,434	**2.89x**
normal season	3.18	$545,688	$110,434	4.94x

Revenue = area 330 ha x expected yield x price. Coverage is revenue divided by the remaining debt service of the loan, before the borrower's other costs; other-bank debt $49,000 reduces it further. Expected yield -35% vs normal (analog seasons: 2010, 2017, 2008).

3. Proposed schedule

Due date	Principal	Interest (quarterly, on outstanding)	Total
19 Apr 2023	$0	$2,332	$2,332
19 Jul 2023	$0	$2,332	$2,332
18 Oct 2023	$0	$2,332	$2,332
17 Jan 2024	$0	$2,332	$2,332
13 Mar 2024	$105,000	$1,435	$106,435
Total	**$105,000**	**$10,765**	**$115,765**

New maturity 13 Mar 2024 (about 10 months after the current one); interest-only until then, principal repaid from the next harvest. Rate unchanged at 8.91%. Collateral (warrant on grain, $120,500) to be confirmed or extended; insurance to be renewed for the next season.

4. Conditions and approvals

- Renewal of agricultural cover for the next season (parametric offer available).
- Updated field declaration and sowing plan.
- Collateral extension registered before the first disbursement date.
- Stage review at each quarter: a restructuring keeps the loan in Stage 2 until performance is demonstrated (IFRS 9).
