Borrower	**Granja San Pedro S.A. (F045)**	Loan	**L047 · Crop input loan · $180,000**

Proposal to extend the maturity of loan L047 to 28 Feb 2024 (next harvest), with interest-only payments until then.

1. Current position

Outstanding principal	**$180,000**	Stress level / score	**Severe / 100**
IFRS 9 stage	**Stage 2 (critical climate alert (level Severe))**	Current maturity	**17 Apr 2023**
Days past due	**0**	Remaining scheduled debt service	**$190,822**

Due date	Principal	Interest	Total	Status
17 Apr 2023	$180,000	$10,822	$190,822	unpaid

2. Rationale: repayment capacity at the expected yield

Yield case	t/ha	Revenue at $240/t	Remaining debt service	Coverage
p50 (expected)	5.47	$327,988	$190,822	**1.72x**
p10 (bad draw)	4.14	$248,596	$190,822	**1.30x**
normal season	8.27	$496,200	$190,822	2.60x

Revenue = area 250 ha x expected yield x price. Coverage is revenue divided by the remaining debt service of the loan, before the borrower's other costs; other-bank debt $190,000 reduces it further. Expected yield -34% vs normal (analog seasons: 2017, 2008, 2011).

3. Proposed schedule

Due date	Principal	Interest (quarterly, on outstanding)	Total
19 Apr 2023	$0	$4,667	$4,667
19 Jul 2023	$0	$4,667	$4,667
18 Oct 2023	$0	$4,667	$4,667
17 Jan 2024	$0	$4,667	$4,667
28 Feb 2024	$180,000	$2,154	$182,154
Total	**$180,000**	**$20,823**	**$200,823**

New maturity 28 Feb 2024 (about 10 months after the current one); interest-only until then, principal repaid from the next harvest. Rate unchanged at 10.40%. Collateral (warrant on grain, $184,600) to be confirmed or extended; insurance to be renewed for the next season.

4. Conditions and approvals

- Renewal of agricultural cover for the next season (parametric offer available).
- Updated field declaration and sowing plan.
- Collateral extension registered before the first disbursement date.
- Stage review at each quarter: a restructuring keeps the loan in Stage 2 until performance is demonstrated (IFRS 9).
